# Memphis and Charleston RAILROAD COMPANY.

\$600,000 Second Mortgage Bonds For Sale.

These Bonds are part of a series of One Million of Dollars secured by Mortgage on 290 miles of Railroad, of which Messrs. Dening Duer and James Robb are Trustees. They have 20 years to run with 7 per cent. Interest coupons, payable semi-annually in New York. The liens on the Railroad having priority, amount by \$2,880,580, making the total incumbrance \$3,880,50, and its estimated value exceeds 10 millions of dollars. Since the completion of the way expensive improvements. Since the conclusion of the war extensive improve ments have been made, and its condition will compare favorably with that of leading lines of Western Ball way. The profits of the Company from 1858 way. The profits of the Company from 1888 to 182 were large, and after paying interest on Bonded Deby yielded over 15 per cent. to the shareholders those of the fiscal year ending 30th June, 1867, were \$547,857 %, being more than double of the liability for annual interest, including the issue of the 2d Mortgars Bonds. terest, including the issue of the 2d Mortgage and carned during a most unfavorable season owing to the failure of Southern crops.

We are prepared to receive bids for the above Bond

in whole or in part, and recommend them to the pub lic as unquestionable security.

# Central Pacific Railroad First Mortgage Bonds,

It is commonly known that the General Government, for wise purposes, has given its aid an ienconragement to the construct on of one Main Through Line of Railros 1 from the Pacific Ocean across the Territories to connect with the various Eastern Branches of the Pacific Railros system, and show will form the Grand Trunk Route to the Far West, upon which the mighty trans-continental traffic will

The CENTRAL PACIFIC RAILBOAD COMPANY, who are carrying it forward with greater and persistence than was ever shown in any a mil-r wors in ancient or modern times, will build, cown, and control the western half of this Through Line, the most productive, favo ed, and valuable to most the whole, and may just y be regarded as pressessing the richest tranchise ever granted or

The Act of Congress confers upon the corporations, beside the right of way across the Territodes, a gift of 12,800 acres of the public lands per mile, contiguous to this line, and an appropriation from the aution I Credit of Sixty Millions in "ix Per Cost. Bonds, delivered as the work progresses; or the estimated cost of the "brough Line and Branches. These subsidy bonds the Companies may cancel a course of years by the transportation-revices of the Roads, and a small per cent. go of its net camings; they, therefore, constitute an element of great strength to the Corporations.

The Act further authorizes them to issue an equid amount of their own First Mortgage Bonds of corresponding denominations, which shall be the first claim upon the whole railroad property, and to which the tien of the Government shall be subordinate, as a means of more readly securing the remaining half of the capital for the construction; the equipment, &c., being provided out of the Capital Stock subscriptions and other sources.

The Great CENTRAL PACIFIC B&I ROAD is, therefore, in an important see see, a Semi-National Work, aided and commended by the people, the Legi-lattive power, and the \*xecurive officers, though its management is a "min-stered with all the care and forethought of the most emion at pivete corporations. Being under the constant supervision of the Government—who, being the principal creditor, accepts a subordinate and confinent in-n-with so large an amount of additional capita also invested in the property pledged, it is believed that no securit so wo offered in the market possess the same claims to confidence and market value except these of the Government.

Under these favoring anspices very gratifying progress has been made in extending the railroad tack from both directions. Nearly 1,000 miles of the Main Line and converging Branches between the Missouri River and the base of the Rocky Mountains have been built within three years. The CENTRAL PACIFIC RAILROAD has also steadily and successfully carried the Main-stem Line from the steambeat navigation of the Facilite to the summit of the Sierra Nevadas, and into the Great sait Luke Basin cast of the Celifornia line. Having overcome by far the most difficult and expensive portion of the whole line, the probabilities of the through connection with the eastern lines being effected in 1870, amount almost to certainty.

The prominent feature in the progress of the CENTRAL PACIFIC RAILROAD is the remarkably large and profitable Local Business which is developed upon the completed portion; more than justifying the estimates of its projectors—that the immense traffic between the ports of California and the Mining Regions of the in erior wou'd sustain a first class railroad line, even if the overland connection were not built. The net profit upon operating the link of less than 100 miles, thus far reaches nearly two millions in gold; and this ratio will be doubled during the coming season, when the entire mountain transit is made by the locomotive. With every extension of the track the business and profits of the completed part a.e. increased; so that when the Overland through traffic shall be centred upon the Central Road, the general prosperity of the Company will be without parallel, and its Securities appreciated correspondingly.

The CENTRAL PACIFIC RVILROAD COMPANY offer for sale their FIRST MORTGAGE THIRTY YEAR SIX PER CENT. GOLD BONDS, and submit to investors the following, among other obvious considerations; and invite the comparison with the merits and excellences of any class of corporate securities:

These bonds are based upon the most vital and valuable part of the Grand National Facific Railroad, soon to become the main channel of communication on the continent.

II. The local settlement and business therefrom is remarkably large and profitable, and must constantly increase.

III. The hardest part of the road is now built, and the remainder will be rapidly carried forward over the Sai. Lake Plains.

IV. The greater part of the means necessary to build the road is provided by the U. S. Government upon a subordinate lieu.

V. The State and chief cities of California have contributed upward of \$3,000,000 to the enterprise, without lien.

VI. The grant of land is destined at an early day to prove of far greater market value than the total of the First Mortgage bands issued upon the road and equipments.

ViI. This Road lies altogether among the gold and silver producing regions, and its revenues are received in coin.

VII. The management of this Company has been in the highest degree prudent and frugal; and the whole surplus, after payment of expenses and interest, is devoted to construction purposes.

1X. The interest liabilities of the Company are even now less than a third the net earnings upon the Road pledged. X. Both principal and interest are payable IN GOLD, under special provisions of both National and State enactment.

The Bonds are in sums of \$1,000 each, with semi-annual gold coupons attached, and are offered for sale at 95 per cent. of their par value and accrued interest from July 1 added, in currency.

There is an important advantage of about one per cent, upon the outlay in purchasing before Jan I, as the bank interest is charged at six per cent, in CURRENCY, though repaid in full in GO. D. At mistime they yield nearly

### Nine Per Cent. upon the Investment.

These Bonds bid fair to attain the most prominent position among the non-speculative investments of the country, and will be actively dealt in at the money centers in Europe.

Holders of G vernment Secu-ities have an opportunity of each nging them for Central Pacific Bends bearing an equal rate of interest, with the principal well secured, and of realizing a profit of ten to fifteen per cent. In addition.

Orders sent with the funds through responsible Banks or Express Companies will receive prompt attention. Bonds sent by return Express to any address in the United States, at our cost. Information, Descriptive Pamphlets, Maps, &c., farnished on application at the office of the Railroad Company, No. 54 William street, and of

### MR. SHERMAN'S FUNDING PROJECT.

It is to be regretted that in some influential quarters promises continue to be made of some comprehensive financial scheme which is to satisfy every want of our defective system, and to include contraction, taxation and the general policy of the government. We have had for years past numerous prophetic hints of such panaceas. But so far they have always disappointed expectation, baffled the hopes of the projectors and misled those persons who looked to such sources for pressing needed reforms. The truth seems to be that we must be content to deal with our somewhat troublesome financial vessel as a good sailor behaves at sea. If his ship springs a leak he attends to that, if a mast or a sail or a part of the cordage needs overhauling, he takes each detail in turn and thus keeps the whole ship taut and trim. In treating the defects of our financial barque, we must deal with them one by one, correct them one by one, and, above all, we must learn how to let well enough alone. If certain sen ators had not lost sight of some of these simple principles they would not have introduced into Congress the bill before us.

of the Sevate, reported this measure, which is, we understand, to be pressed in Congress immediately after the holidays. The chief objects of this measure are two. First, it applies itself to the Five Twenties and the other obligations of the government which are in this country, and offers to exchange them at par for a new non-taxable Ten-Forty bond, which will give 5 per cent. a year to the holder in coin. Secondly, it offers to foreigners who hold Five Twenties to exchange them for a non-taxable bond yielding 41 per cent. a year,

payable in Frankfort and London.

These are the main points covered by the bill; which has, however, several subordinate features. The first section provides that the expense of funding the home debt shall not exceed 1 per cent. Now this rate on 2,000 millions will amount to the vast sum for commissions, &c., of 20 millions of dollars. This new funding scheme is naturally very attractive among a certain class of financial aspirants; seeing that it proposes to distribute business the doing of which will be so lucrative. In the negotiation of the fereign loan the relative gains would be on still larger scale; and they would be attended with a control over the foreign exchange business, the profit resulting from which would be extremely handsome to the party who were lucky enough to get the appointment of foreign agents for themselves and their friends. The spirit of retrenchment is, however, too vigilant to allow 20 millions or more to be thus added to the too heavy burdens of the national debt.

Another subordinate feature of the bill is the exemption of the proposed new bonds from all taxation whatsoever. At present the United States bonds are not free from federal taxation. They are only free from State and municipal dues; and the aggregate of these dues throughout the country is prospectively so small that the exemption is really no hardship. It has never given rise, we believe, to any bitterness of feeling except in certain Western States where scarcely any federal bonds are held except by the national banks, which are now taxable by the States without question. The new bill would renounce beyond recall the right of the federal government to tax United States bonds, and would make such property absolutely untaxable forever. This is obviously a very dangerous principle, and is proposed to be introduced now for the first time into our fiscal legislation. It is an intelligible provision, and perhaps a wise one, that the federal government which requires such prodigious revenues to sustain the public credit should appropriate exclusively to itself a certain field for the imposition of its taxes, and that local taxation, which is comparatively small, should not trespass on certain reserved parts of that field. At any rate, it always has been and always should be the law of this country that no local government shall tax the bonds of the gen-On Tuesday Mr. Sherman, from the Finance Committee eral government. But for the latter to give up the right to

tax this kind of property because the right cannot be shared by the former is, we repeat, to establish a precedent which may breed mischief hereafter.

Connected with this subject is the proposition of section 2d to pay the individual States an annual sum as compensation for the taxes which, as we have seen, the States have no right to impose on Federal bonds. The Government, which has the right to tax, is to give up the right without compensation, and it is, moreover, to pay over a considerable annual sum to the individual States besides. If such a preposterous payment is to be made it should be voted yearly out of the taxes with the other ordinary items of expenditure. To resort to the pnerile device of allotting 6 per cent. interest on bonds, while really paying 5 per cent., and dividing the remaining one per cent. between the sinking fund and the States is absurd. The sinking fund is provided for by existing laws. Let Congress enforce these laws. The States have no right to tax the U.S. bonds; still, if Congress thinks proper, it can vote to give an annual sum to each of the States in lieu of such taxes. But let the vote be an open, annual vote subject to revision, and distributed according to some wiser principles than that of the relative population, which would give to some States a good deal more, and to others a good deal less, than their equita-

Our space forbids the further discussion of those provisions of the bill which deal exclusively with the bonds. We next pass to the fifth section, which takes up the currency and attempts to remodel that, as the earlier sections have remodeled the funded debt. That we may do no injustice to the unique plan for reforming our paper money system, we give the words of the proposed law which provides: "That the holder of any lawful money of the United States to the amount of one hundred dollars, or multiples of one hundred dollars, may convert the same into a bond for an equal amount, the notes so received to be held in the Treasury as a part of the reserve already provided for, and the holder of any of the Five-Twenty bonds, or of the bonds contemplated by this act, may demand their redemption in lawful money of the United States; and the Treasurer shall redeem the same in lawful money unless the amount of United States notes then outstanding shall be equal to \$400,000,000; but such bonds shall not be so redeemable after the resumption of specie payment; and the Secretary of the Treasury, in order to carry out the foregoing provisions, is required to maintain in the Treasury a reserve of not less than \$50,000, 000 of lawful money, similar in all respects to the United States notes authorized by law, provided the same shall not at any time exceed \$400,000,000."

If previous parts of this bill were designed to please other classes of persons, this section is obviously adapted to con ciliate the inflationists. It would introduce into the currency arrangements an element of discord and confusion whose disturbing influence in business would probably recall our worst experience during the war, when the heavy disburse ments of the Government, requiring five times as much currency as an equal amount of ordinary commerce, neutralized some of the worst evils of the immense issues of paper money and of the morbid feeling during the expansion in 1863 and 1864. Once admit the principle of this scheme and you will not be able to limit the currency to the authorized 400 millions. All our past efforts to reform and contract the currency will thus have been made in vain. An era of speculation and wild perturbations of value will be inaugurated, in the course of which it will be well if we do not plunge into the gulf of national bankruptcy.

Mr. Sherman acknowledges that his bill does not provide

have gone further and acknowledged that the bill does not offer a single provision that the finances of the country really demand. We have shown that this is so in regard to the currency and the bonded debt, both of which it proposes to disorganize and throw into confusion. Let us now turn to the floating obligations of the Treasury, which, as has been often said, are now brought within dimensions so limited as to be incapable of causing embarrassment. Should this bill or any such measure become a law we might be compelled to revoke this favorable opinion as to the short debt. It consists partly of compound notes which mature during the six months May 1st and November 1st, and partly of Seven-Thirties which fall due next June and July. Of the 43 mil. lions of Compounds 101 millions matures on the 15th May, 121 millions on the 1st August, 81 millions in September, and 3 millions in October. The Seven-Thirties amount to 285 millions, about half of which fall due in June, and the rest in the following month. The Treasury has thus to provide for the payment of 328 millions of short paper before next November. Almost the whole of this sum will be converted into long bonds if the Five-Twenties remain as now 4 or 5 per cent. above par. But a large part of the aggregate will have to be paid off in currency if the Five-Twenties should fall to par or below. How long these bonds would be in descending to par under the depressing influence of Mr. Sherman's bill it is too easy to predict. In the 4 or 5 per cent. premium on the Five-Twenties lies our safeguard against the dilution and depreciation of the currency by the issue of a vast mass of new legal tenders, which Mr. McCulloch has the power to emit under existing laws, should the demand be made for currency by the holders of the outstanding Seven-Thirties. In view of these facts, it is gratifying to find that the introduction of the bill into the Senate on Tuesday did not, as was anticipated, depress the Five-Twenty bonds at the Stock Exchange. That mischievous result was averted by the general conviction that the measure could not pass, but would be rejected by Congress. The belief is often expressed that the national debt can be hereafter consolidated into a five per cent. consol, which will command par in gold, at no very distant day; but premature crude attempts at consolidation will defeat their own purpose. Almost all we can do for the present to es tablish the stability of the national debt, is to fund our short embarrassing obligations into long bonds, and to let the existing Five-Twenties alone. It would also be unwise and unnecessary in any future negotiations of consolidated bonds of the United States, to give up the Federal right to tax such bonds equally with other property.

### CONTRACTION OF THE CURRENCY.

Mr. Morton did good service on Thursday in urging the subject of contraction upon the consideration of the Senate. Some members of Congress, it would seem, are not so clearly convinced as they ought to be of the profound anxiety with which the currency is regarded by all classes of our

Since the contraction law of 12th April, 1866, was passed by a large majority in both Houses, and with the general approval of the whole country, the necessity of a modification of that measure has been frequently urged. The House bill recently passed for that purpose, was, perhaps, too sweep ing in its provisions, and a less vague and indefinite measure has been substituted in the Senate. The two bills are subjoined. That of the House enacts: "That from and after the passage of this act the authority of the Secretary of the Treasury to make any reduction of the currency by retiring or cancelling United States notes, shall be and is hereby susall the financial arrangements that are needful. He might pended." That of the Senate enacts as follows: "That so

much of the act approved April 12, 1866, entitled 'An act to amend an act entitled an act to provide ways and means to support the Government,' approved March 3, 1865, as provides that the Secretary of the Treasury may retire and cancel United States notes to the extent of \$4,000,000 per month, be and the same is hereby suspended until Congress shall otherwise provide."

With this legislation pending in Congress, Mr. McCulloch will, of course, stop the contraction of the greenbacks until some further solution of the currency problem shall be arrived at. This problem is, in some of its aspects, the most complicated and difficult which has ever before been presented to the people of any great commercial country. Its difficulties originate partly from a want of clear, definite knowledge of the real nature of our currency maladies. Everybody acknowledges in a certain way that redundancy is the reason why our paper money is depreciated. Too much currency has been issued, and to undo the evil the excess must be called in and cancelled. The currency contraction law therefore was founded on a sound principle, and from that principle in our future currency legislation we cannot safely depart.

If the sound conservative objections to the administration of the law of 1866 are not directed against its principles, they are still less intended to undervalue its results. A fortnight ago we showed that under the powers conferred by this Act, Mr. McCulloch had curtailed the currency to a very large extent, and although the price of gold and of other commodities may not have receded quite as much or as symmetrically as some of our mathematical reasoners had calculated upon, still the working of the law has been, on the whole, very salutary. Had we not thus diminished the volume of the currency we should at this moment, in all probability, have had gold ranging nearer to 175 than to 135, for the mass of the currency which we wanted during the heavy government expenditures of the war period was, for obvious reasons, very much in excess of what is necessary now in time of peace. One of the too-much forgotten benefits of the contraction of the currency which has been effected through interest-bearing legal tenders and by greenback cancellation, has chiefly consisted in preventing a rise in gold and in other commodities which would have been inevitable if, as the effect of war emergencies had gradually died away, and the occasion for the use of currency was gradually narrowing, the volume of that currency had not been contracted to correspond. We do not, therefore agree with those who think it an objection to contraction that it has not reduced the price of gold. On the contrary it is by no means certain that the premium on gold has not been influenced by contraction quite as much as was to be expected under the circumstances.

We often hear the fall of gold spoken of as if that movement were a rise in the value of greenbacks. This popular error supposes that the only force which acts on gold to depress or raise its premium in the market is the "appreciation of greenbacks." But no well informed person is ignorant that gold is exposed in its daily fluctuations to a multitude of other influences which have little, if any, connection with the purchasing power of our paper currency, and which do not enlarge or narrow its value for the purposes for which we use it every day in our domestic business. Hence the perturbations in the premiums on gold, so far as are due to such causes, offer no indication whatever of responsive movements in the value of our paper money. The thermometer does not faithfully register the heat of your room when the mercury is acted on by something else besides the general temperature. No more does gold register Accurately the depreciation of the currency where its daily exhibited in the following statement:

power is deflected and put up and down by the foreign exchanges, by the imports or exports of specie, by the supply of gold in the market, by the prospects of political complications or short crops in Europe, by the payments of interest or the arbitrary sales of gold from the Treasury, and by a thousand other contingencies which shrewd men in Wall Street pursue, measure and govern their speculations by, to the aggregate of hundreds of millions of dollars a year. In face of these facts he would be a bold man who would say that every movement of reform in the currency must register itself in an immediate reduction of the gold premium, and conversely that every rise and fall of the latter indicates corresponding changes in the former.

Of course we do not say that the premium on gold is in no controlling degree regulated by the redundancy and depreciation of the currency. But we do say that this depreciation, this loss of purchasing power is one among a multitude of conflicting forces, all of which modify and agitate the market price of gold. Of these forces, depreciation is certainly the chief; it has wider scope than any of the others; it is that disturbing force without which the others would lose most of their efficiency. The real price of gold, if we could fix it at any time, would measure the paper currency depreciation, and its changes at intervals would indicate the variations in the purchasing power of our paper money as a thermometer measures the transitions of heat and cold. But the real price of gold is not the market price. In great emergencies we have seen, and we may again see, the two very wide apart. In July, 1864, the market price of gold was 285, but its real price must have been much below that point as is proved by the fact that the purchasing power of the greenback-dollar in the hands of the mechanic who wished to buy with it food or other necessaries was about as great when gold was at 285 as a few weeks before when gold was at 168, or some months later when gold was below 150. We might just as wisely declare the law of gravitation inconstant when the sea pours its waters into the Hudson and reverses its current twice a day, as claim that gold under all the tidal perturbations in its market value shall always indicate to a fraction the effects of contraction, and the exact movements in the appreciation or depreciation of our paper

The necessity of contraction, its usefulness, and the benefits it has conferred, being thus acknowledged, Mr. Morton was right in his efforts to get definite action taken on the subject. The people of this country believe with Mr. Mc-Culloch that it is a great evil to have a depreciated paper currency. But they are of opinion that there are greater evils still. And among these greater evils they reckon the putting into the hands of one man, unchecked by publicity, the arbitrary control over the volume of the currency, and the consequent power to regulate the standard of value and the productiveness of business for the whole country. Whether right or wrong in this belief the people are generally influenced by it. Hence, the duty of Congress is to acquiesce without too much delay, and to devise some machinery of contraction which shall not be made unpopular by the same complaints. When the existing powers shall have been withdrawn, the way will be opened for the establishment of a new method which shall be more elastic in its working, and less mischievous in some of its results.

### RAILROAD EARNINGS FOR NOVEMBER.

The gross earnings of the under mentioned railroads for the month of November, 1866 and 1867, comparatively, and the difference (increase or decrease) between the two periods, are

October gave the maximum monthly earnings in both years. The November fall from the maximum of 1866 was 11.0 per cent., and of 1867 13.3 per cent., indicating a more sudden relapse in the latter year. The results show, however, an increased business in 1867 of \$44 per mile of road operated, or

The total gross earnings for the eleven months of 1867 exhibit an improvement over those of the previous year by \$171 per mile, or 1.72 per cent. The early coming of winter this year may be prejudical to the December returns, but any material decline from the earnings of December, 1866, need not be anticipated. There is some falling off, indeed, in the weekly statements, but not more than, under the circumstances, might have been expected.

### THE PRIVATEER CONTROVERSY WITH ENGLAND.

An abrupt end has been made by our Government to the negotiations with the British Government, in relation to the claims for indemnity for the depredations of the rebel privateers which had been fitted out in British ports during the war. Mr. Seward on the 28th of November last addressed a letter of instructions to Mr. Adams, which appears to be the ultimatum. He says:

We are now distinctly informed by Lord Stanley's letter to Mr. Ford, that the limited reference of the so-called Alabama claims which Lord Stanley proposes is tendered upon the condition that the United States shall waive before the arbitration the position they have constantly maintained from the beginning namely, that the Queen's proclamation of 1861, which accorded belligerent rights to insurgents against the autherity of the United States, was not justified on any grounds, either of necessity or of moral rights, and therefore was an act of wrongful intervantion, a departure from the obligation of existing treaties, and without the sanction of the law of nations. The condition being in-admissable, the proposed limited reference is therefore declined.

As we have before frequently stated, it does not seem to us that the question of the propriety of the conduct of Great Britain in according belligerent rights to the rebels, has any

but a very subordinate position in this controversy. When Earl Russell declined to take any other ground than that the municipal law of a nation and the domestic interpretations of that law are the measure of its duty as a neutral, he displayed a profound misconception of the nature and objects of international law, and of course occluded the possibility of negotiation. We then predicted the modification of this position in these words: "A change in the British Ministry may ere long put into the Foreign Office some statesman capable of grasping the real merits of this question, and of bringing it to a settlement which shall do equal honor to Great Britain and to the United States, by making them parties to the permanent establishment of the great principle, that neutral nations must assume a full responsibility for all acts done by their subjects in violation of the absolute and well-defined duties of neutrality."

The accession of Lord Stanley to power was the fulfilment of this prediction. Himself a statesman, a member of the family of Derby, in which statesmanship was as an heir-loom, he lost no time in informing Mr. Adams that he was willing to undertake the adjustment of the controversy. In a despatch written on the 9th of March, 1867, he announced the willingness of his Government to go into an arbitration to determine "whether in the matters connected with the vestels out of whose depredations the claims of American citizens have arisen, the course pursued by the British Government, and by those who acted upon its authority, was such as would involve a moral responsibility on the part of the British Government to make good, either in whole or in part, the losses of American citizens."

Mr. Seward, in reply, insisted that the United States should be at liberty to plead in addition the actual proceedings and relations of the British Government, its officers, agents and subjects, toward the United States in regard to the rebellion and the rebels, during the war, as among the matters which are connected with the vessels whose depredations are complained of. This construction of his proposal Lord Stanley, in letters to Sir Frederick Bruce and Mr. Ford, could not admit, and the result was the termination of negotiations.

It appears to us conclusive that cur Government, as plaintiff in this case, should have accepted Lord Stanley's proposal, and been willing to rest its claim for indemnity upon the fact that the Alabama and other privateers were suffered to go to sea. By that act Great Britain clearly violated the law of nations. As a neutral she had no right to favor one party to the detriment of the other. For that offence she stands indicted before the grand inquest of the Nations, and Lord Stanley acknowledged this indictment when he expressed willingness for an arbitration to determine whether the course of his Government involved a moral responsibility to make good, in whole or in part, the losses of American citizens. The law of nations, and not the municipal law of a country must decide the question.

It is hardly necessary at this late day to do more than call to mind the principle which underlies this liability. On a former occasion we discussed the legal question very fully, and showed that under our own interpretation of neutral rights and duties, and under the interpretation of Great Britain, the course of the British Government with regard to these Privateers was an evident violation of the well known principle of international law that it is the duty of the neutral to be in every way careful to do equal and exact justice to both the parties at war. Entire abstinence from participation in the war is not sufficient, but there must be absolute impartiality of conduct toward both. "He is an enemy who does that which pleases the enemy." For example, it will be remembered that in our Revolutionary war the subjects of the King of France fitted out and des

patched vessels and men to the aid of the Americans. The British Government made this conduct of theirs the ground for a declaration of war against France, although the French Government had, by proclamation and other means, asserted its neutrality and formally endeavored to prevent this action of its subjects. This was the way that Great Britain held other powers responsible, when the interests of her own people were involved. The same rule must apply now to herself.

Our own Government, from the earliest days of its existence, acknowledged this obligation of international law. General Washington caused ships that were building for French privateers to be detained in port; President Monroe in like manner caused vessels to be seized that were fitting out in aid of the Spanish American republics; and Mr. Polk would not permit a war steamer, which the German Confederation had purchased in New York, to sail from this port till a bond had been given that she would not be used against Denmark.

This principle is broad enough for the entire negotiation, and it is, we think, an evident mistake on the part of our Government to embarrass it, by introducing the issue whether Great Britain is not liable for damages for having acknowledged the rebel States as belligerents. There is no doubt the British Government acted from sympathy with the Southern Confederacy, and did an unfriendly act. But it is a question to be determined on wholly different grounds; and judgment, if given against Great Britain, would have little to do with the spoliations of American commerce.

In the determination of the main issue, whether Great Britain is not responsible for these depredations, every nation of the world is vitally interested. It is a question whether in the event of war at any time between whatever countries, the ports and dockyards of neutral nations can be freely used for the building and fitting out of privateers, and of course whether citizens of a neutral country can lawfully participate in such a war. If they may do so, the entire list of claims for depredations on the property of our citizens by cruisers built and fitted out in British ports, must be rejected. In future the occurrence of hostilities any where would in that case be the signal for the establishment of recruiting stations in every neutral state where it can be done with advantage. Hence we see that it is not a mere question of money; the principle at stake is of the highest importance, and part-icularly so to the British government. She cannot afford to proclaim to the world that neutrals are at liberty to furnish her enemies an asylum for fitting out expeditions against her. If she can, then we likewise can afford to waive our claims, and take pay in transferring to ourselves in this way her carrying trade on the occasion of any future war she may be engaged in. But, let the question be adjudicated as it will be by an impartial tribunal, and we have no doubt but that an enlightened view of the duty of neutrals will be taken, so that a similar issue will hardly arise again at any future time. Our citizens who have lost property by the rebel cruisers fitted out in British ports will be fully indemnified, and a great impediment to perpetual friendly relations with the British government will be taken away.

The financial of the maritime and international law for other nations, as it

seems sometimes to have assumed—we ought to meet every advance which is in the right direction. When it proposes

to submit to arbitration a question which can be determined entirely by well-defined principles and precedents, we cannot approve the views of statesmanship which would embarrass the question by intruding other methods which are to a great degree irrelevant.

### NEW YORK CENTRAL RAILROAD.

The following analysis of the operations and finances of this company is compiled from the report for 1866-7 just issued, and the like reports made for the three previous years.

The New York Central Railroad is constituted of the following lines and branches:

Main Line.—A  Lateral and Branch Lines.	thany to Buff-lo   Schenectady to Troy   21.00     Schenectady to Troy   21.00     Schenectady to Troy   104.10     Batavia to Attice   11.00     Batavia to Attice   14.15     Rochester to Suspension Bridge   74.15     Lockport Junction to Tonawanda   12.15     Rochester Junction to Chariotte   6.88     Buffalo to Lewiston   28.25     Saratogo and Hudson River Rallroad   37.37     Scharatogo and Rudson River Rallroad   37.37     Scharatogo and Rudson River Rallroad   37.37     Scharatogo and Rallroad   37.37     Scharatogo and Rudson River Rallroad   37.37     Scharatogo and Rallroad

١	Total as will appear January 1, 1868\$9,908,500

The amount of bonds outstandi g on the 1st Apri', 1860, and yearly at the same date to 1867, is shown in the following statement:

ł	April 1.	Amount.	April 1.	Amount.
Į	1860	\$5,0 6,700	1864	\$4 769 500
Į	1861	4,913,700	1865	4 671 800
I	1862	4.812,500	1866	4 606 800
	1863	4,839,000	1867	5,761,500

The assessed valuation of real estate subject to taxation was in the year 1859 \$69,846,845. By 1862 in consequence of the then prevailing disturbances, it had fallen to \$40,240,450; but the taxes for 1866 are based upon a valuation stated at \$81,961,610, double that of the year 1862. The following table gives the assessed valuation for the years 1859-60 to 1866-70 (8 years), and the amount of taxes collected for general purposes in each year:

Year.	Assessed valuation.	Collected	Year.	Assessed valuation.	Taxes Collected
1859-60		\$806,875	1863-64	\$49,409,030	678 196
1860-61		871,936	1864-65	53,205,850	868 617
1861-62			1865-66	73,960,700	849,308
1862-63	40,240 450	528,354	1866-67	81.961.610	200 COL

The special taxes are for public sewers, the harbor and the police. A large revenue is also derived from merchant and other licenses, the water revenue, &c. The total revenue and expenditures for 1862-3 and 1866-7 compare as follows:

Balances from previous year	939,234 37 340,477 76	1864-65. \$148,543 08 1,512,519 63 126,605 20 73,947 48	1866-67. \$107,090 37 2,099,594 62 975,000 00 95,000 00 10,956 56

Balance to credit	\$136.355.80	\$156 507 94	990 000 ez

Principal Sources of Revenue 1866-67.—Real estate taxes—for general revenue \$767,451 40, and for new limit fund \$71,374 23; police taxes \$202,576 86; seaer taxes \$81,030 74; wharf taxes \$....; special taxes \$78,650 69. Licenses—merchants' \$113,303 59, and dram shops \$70,685 00; water licences \$222,179 30, and pipe bills \$73,000 15; market rents \$45,950 00; rent tobacco warehouse \$3,854, hay and coal scales \$18,720 42; fines and fees \$37,759 42; city commons \$26,802 46; wharfage \$78,226 88; dog, vehicle and other special licenses \$29,539 08; assessments for opening streets \$115,353 86; bonds and loans \$1,070,000, &c.

Expenditures 1866-67.—Interest \$399,551 78; discount on 975 bonds \$188,906 00; bonds redeemed \$148,500; sinking fund \$20,000; waterworks \$281,735 93; police \$214,666 65; wharf \$219,553 30; engineer dept. \$120,936 27; fire department \$225,652 87; lighting city \$41,285 09; streets, grading, repairing and cleaning \$827,664 58; workhouse \$34,208 74; house of refuge \$34,898 02; hospital \$86,282 21; board of health \$48,046 09; city council and clerks \$17,380 89; printing and stationery \$21,956 25; union market house \$13,158 96; city market house \$3,287 90, salaries \$63,757 19; contingencies \$63,757 19; parks, square and places \$30,956 5b; public sewers \$121,833 90; special tax fund \$128,868 73; ward (new limit) expenditures \$127,017 80; opening streets \$165,822 98, &c.

The following table compares the population, valuation, taxes, ordinary and total revenue (exclusive of balances), and expenditures, debt, &c., for the years 1860-61, 1862-63, 1864-65 and 1866-67.

	1800-01.	1909-09		1000 011
Population	160,773	180,000	204,327	220,000
Valuation (R. E)	\$73,765,670	\$40,240,450	\$53,205,850	\$81,961,610
Taxes collected	871,936	528,354	868,617	83 1,826
Revenue (ordinary)		939.231	1,512,519	2.037.594
" (includ. bds. &c)	1,300,240	1,312,992	1,713,072	3,180,551
Expenditures (total)	1,356,486	1,330,019	1,705,022	3,258,681
Debt (bonds)	4,911,780	4,839,000	4,671,500	5,761,500
Reducing these figures	to their rel	ation to po	pulation giv	res the fol
lowing results per capita				
Valuation (R. E)	\$457 55	\$223 55		\$372 55

the following as the percentage;				
Taxes collected	1.19	1.81	1.63	1.02
Revenue (ordinary)		2.33	2.84	2.56
" (total)	1.76	3 26	3.22	8.88
Expenditures (total)		8.30	3.20	3.90
Deht hands	6 66	12.02	8.78	7.03

The debt, as it will exist on the 1st Jan., 1868, viz., \$9,908,500, will be distributed upon about 240,000 heads, and borne by a valuation of about \$100,000,000. This will give a ratio of \$41 26 per capita, and be 9.91 per cent. on the valuation.

It may here be remarked, however, that the great bulk of the debt of St. Louis has been incurred for public improvements, which either directly or indirectly are productive. The water works pay, or soon will pay, the full interest on the water bonds, as do also or will the wharf and harbor improvements, &c. The railroad and municipal debts alone are really burdens on the people, and these taken together form about a fourth of the aggregate.

### THE TOBACCO TRADE OF THE UNITED STATES.

We present below our first annual statement of the growth, movement, and prices of tobacco in the United States, being for the year ending November 1st, 1867. This has been a work of no little difficulty, owing to the circumstance that the statistics of important districts are very imperfectly kept. In fact there are none worth the name, except for the ports of New York, Baltimore and New Orleans, which are shipping and distributing ports rather than the primary receivers. Still the tables we have furnished in our weekly report through the year indicate, in the totals we give below, so clearly and readily the entire export movement of the country, that the domestic movement is more easily supplemented than ever before.

As to the crop of tobacco for 1867, there appears to have been a very decided falling off. The following statement indicates the extent of the growth of leaf tobacco in the United States for the last two years:

Kentucky and the West	hhds.	1866. 125,∪00	1867. 73,000
Ohio	44	18,000	10,000
Maryland		40,000	30,000
Virginia.	55	45,000	50,000
Total	44	228,000	163,000

This remarkable decrease was foreshadowed, in the reports from Kentucky, as early as June last, and immediately led to a large advance in prices. The export movement, however, notwithstanding the advance, was very large, and the crop year closed on low stocks of desirable qualities.

Of Seed Leaf, the growth for five years was as follows:

				1863		1864.	1865.	1866.	1867.
Massachusetts and Conn.	(0	9999	1				25,000	30,000	20,000
Pennsylvania	10	16	,.				8,000	5,0 0	2,000
		**							
New York		**					8,000	6,000	1,500
Ohie							12,000	20,000	10,000
Western States		**			-		5,000	5,000	2,000
and the second second									
Total cases				110.000		80,000	58,000	66,000	35,500

We have here, also, a marked decrease in the yield, while at the same time the demand has not been curtailed so much by the high prices asked as by indifferent assortments.

This decline in the growth of tobacco this year is due in part to the unfavorable season, but the principal cause may be found in the very high prices and scarcity of field labor in the Northern and Western States, and the disorganized condition of affairs in the old Tobacco growing States of Kentucky, Tennessee, Missouri, Maryland and Virginia; the very high prices borne by articles of food, and the smaller

amount of labor required, comparatively, for their cultivation, have also had an unfavorable effect, serving to divert attention to the growth of wheat, &c., in many districts in which Tobacco has heretofore been a leading article of cultivation. Of the prospects of future tobacco crops, it may be justly said that they are not promising. Labor in the Southern States will no doubt be more, instead of less disorganized during the next two or three years, and while at the North there may be some improvement in this respect, other crops promise to be more valuable than tobacco, even at the enhanced prices current.

Our tables showing the export movement during the year present many interesting features. It will be seen that the total exports of crude tobacco from the United States for the twelve months reach 165,799 hhds., 52,675 cases, 32,831 bales and 716 tierces of leaf, besides, 6,801 hhds. and 924 bales of stems. The shipments of manufactured tobacco have also been very large, amounting in all to 8,646,142 lbs. and 15,276 pkgs. Below we give our tables showing at a glance the movement for the year.

EXPORTS OF TOBACCO FROM THE UNITED STATES FROM NOVEMBER 1, 1866, TO NOVEMBER 1, 1867.

We now subjoin such detailed statements of the various leading markets as we have been able to compile;

NEW YORK .- The year under review was very active in the tobacco trade of New York, although since its close business has fallen to a very small aggregate. Opening in Nov., 1866, under a heavy money pressure, prices were sustained in the face of a large sale of seed leaf to realize. A leading manufacturer took 1,100 hhds. just before last Christmas, and January opened with some improvement in the better grades. In February a further advance took place for Kentucky, while a liberal export demand for Seed Leaf set in. February was also noted for large sales of Havana and manufactured for export. In the latter part of the month there was renewed activity in Seed Leaf. In April the real state of supply and demand began to be appreciated, and a decided speculation set in for Kentucky, which carried up prices 1@2c. per lb., in the face of warlike news from Europe. The announcement of the French contract in May, caused a large export demand for hhds. with a strong speculation, both in Leaf and Seed Leaf, and prices were further advanced. There was also some speculation and a good arrors further advanced. There was also some speculation and a good export demand for Manufactured Tobacco. The buoyancy and activity of May was continued without an interruption in June and July for all descriptions; and during the latter month the reports from Kentucky as to the growing crop began to be very unfavorable. The month of August was active and excited throughout—the sales being about 7,500 hhds., 5,200 cases lcaf, and 25,000 cases manufactured. In Kentucky tolacco and developed the formula of the forest of the formula of the formula of the formula of the formula o was established, the West participating largely in the speculation. An improved demand for Spanish tobacco was also noticed. September witnessed the culmi nation of the advance, and closed with sellers disposed to realize. A new rule of the Treasury Department, respecting the storing and bondnew rule of the Treasury Department, respecting one storing and conding of manufactured tobacco, gave great disatisfaction, and interrupted the operations of the cutters. In October, the closing month of the cropy year, the sales of Kentucky Leaf were very large, but it was a realizing market; holders meeting buyers freely and prices were scarcely so firm, The interior markets all became quiet, with a downward tendency. The reports of injury by frost were not fully confirmed. Exporters complained of the indifferent character of the assortment. The sales of

Spanish were very large early in the month.

From this rapid sketch of the Tobacco trade of New York for a year,

From this rapid sketch of the Tobacco trade of New York for a year, it will be seen that this branch of business has been exempt from the disasters that have overtaken almost every other. A large manufacturing house failed, it is true, but it was understood to have been brought down by complications having no relations with the trade. We enter upon the New Year with high prices, moderate stocks, and a slow trade; and it will be great good fortune if the successful results of operations in the past year shall not lead to enterprises of doubtful wisdom, whereby losses may be incurred. Gold prices are now fully 20 per cent. higher than one year ago. The receipts of tobacco at New York from Nov. 1, 1866, to Nov. 1, 1867, have been as follows:

Total exports	82,689	89,806	6,921	16.350

but the assortment has been deficient, and stock; small. Prices have advanced 1@3c per lb. during the year.

KENTUCKY.—The following is the annual statement of the Tobacco trade of Louisville:

Stock on hand, November 1st, 1866 Receipts since, to November 1st, 1807	Hhds. 4,768 34,983
Total Deliveries	89,761 36,270
Stock on hand, November 1, 1867, Sales for the year. Sales last year	3,511 41,609 84,904

The value of the sales for 1867 is set down at \$4,434,758 34. direct" receipts for the year are reported at 30,835 bhds.,

against 24,141 last year.

The market at Louisville ruled firm and active all the year, prices gradually hardening towards the close, as the prospects of the growing crop became impaired, and the stocks at leading points became reduced by the export demand, leading to a considerable speculative movement

VIEGINIA.—The following is a statement of the inspections of tobacco at the principal markets of Virginia, for the year ending Oct. 1, 1867: at Richmond hhds.
At Petersburg.
At Lynchburg.
At Lynchburg.
At Lynchburg. 26,374 10,278 Total.....

We have been unable to obtain for this review the details of the shipments from these points. The local journals and trade circulars are silent on the subject. But we have in the receipts at New York, Baltimore, &c., and the exports to foreign ports from Virginia, some indication of the direction these inspections have taken. The Virginia crop for 1868 promises to be an improvement on that of 1867.

[From our own Correspondent.]

### London, Wednesday, December 4, 1867.

Since Saturday last business, in nearly all departments, has been characterized by continued inactivity, and merchants have displayed much caution in transacting business. The position of the cotton trade and the fears entertained that numerous failures must take place in that branch of business, is still having a powerful influence on our commer. cial affairs, and probably not until cotton has seen its lowest point, and spinners show more confidence in operating, can we expect any permanent sound and healthy trade. As I have frequently stated before, the present trade of the country is of a strictly legitimate character, and after theextensivespeculations of the last few years, this will be productive of immense good. Prices have now attained a fair level, and, in many cases, appear to have fallen to the minimum point.

In the Stock Exchange, much quietness has prevailed, but, taken as a whole, there has been more firmness apparent, and the tendency of prices has been rather favorable. The demand, so far as the public are concerned, is for colonial government securities; but speculators are operating chiefly in foreign government securities and in British railway shares. The market for the latter, though rather less depressed, is still very unsatisfactory, as an impression seems to prevail that prices have not yet seen their lowest point. During the late heavy fall, however, the public do not appear to have parted with their stock, and, by their action, to have assisted the downward movements. The lower prices were the result of the unfavorable reports in circulation, and the heavy adverse operations within the Stock Exchange. Consols, during the week, have been flat, owing chiefly to the heavy withdrawals of gold for transmission to the Continent. The highest and lowest prices on each of the three first days of the week are subjoined:

	Monday,	Tuesday.	Wednesday	
Consols for Money	94%@94%	93%@93%*	93 @9314	
* 1	Ex dividend.			

Owing to the preparations which have been made for the bills which have matured to-day, namely, on the "fourth" of the month, there has been more activity in the demand for accommodation; but, considering the period of the year, the applications for discount have not been to any important extent. During the few remaining weeks of the year, it is probable that a steady demand will be witnessed, and it would seem that the open market minimum and that of the Bank of England will show but little variation. Although large sums of gold have lately been withdrawn from the Bank, it is not believed that any advance in the Bank minimum will take place. In the open market the best short-dated paper is taken at 14 per cent. Annexed are the quotations for the best bills having various dates to run:

	Per Cent		Per Cent.
30 to 60 days' bills	134@174	6 months'bank bills 4 & 6 months' trade bills	2½@. 2 @3
4 months' bank bills	13/002		-

The changes in the rates on the Continent since Saturday last have been unimportant. Generally speaking much quietness prevails. Annexed are the quotations at the leading cities at this date and at this period last year:

-	-B'k	rate-	-Op.	m'kt-	-	-B'k	rate-	-Op.	m'kt
	1866.	1867.	1866	. 1867.		1866.	1867.	1866	1867.
At Paris	3	8 2%	-2%	134-214 1	Turin	6	5	-	
Vienna		4	516	4	Brussels		234	2%	214-214
Berlin	436	4	4	2%	Madrid	7	5	-	_
Frankfort.	336	236	336	134-2	Hamburg .	-	-	334	8
Amst'rd'm	5	336	5	8	St. Petb'g.	7	7	8-9	8-9

Bills of exchange have been very scarce, and, in some instances, the quotations are rather less favorable to this country.

In the bullion market the principal feature is an active demand for gold for transmission to the Continent. As there have been no arrivals, nearly £450,000 has been taken out of the Bank since Thursday morning last, and hence the Bank return to be published to-morrow is likely to show a considerable diminution; but as coin is now returning in considerable quantities from the Provinces, the decrease may not be so great as the heavy withdrawals, which have been alluded to, might lead one to expect. The supply of gold now on passage from Australia is between £700,000 and £800,000, and it is probable that the whole of this will be absorbed by the continental demand. In silver very little business is doing. There is no demand for remittance to the East, and hence the chief business doing is for the Continent at 60½d, for fine bars and 58 15-16 for Mexican dollars.

In the wheat trade much inactivity has prevailed, and prices have fallen to the extent of 1s.@2s. per quarter. Our imports are very large and, during the week ending November 30, were as much as 1,000,000 cwt; but, on the other hand, our receipts of flour are small. Since the 1st of September we have imported 9,636,191 cwt. of wheat, against 5,087,883 cwt. last year, showing an increase during the present year of 4,509,000 cwt. In our receipts of foreign flour, however, there is a diminution of 20,000 cwt. Our exports of wheat since September have been only 329,757 cwt., against 225,046 cwt. last year; and of flour, 8,239 cwt. against 5,375 cwt. in 1866. Annexed are the particulars of our imports and exports of wheat and flour into and from the United Kingdom from September 1 to November 30, compared with last year:

In November alone our imports of wheat were 3,339,553 cwt., while in the corresponding month in 1866 they were confined to 1,995,106 cwt., in 1865, to 1,824,573 cwt.; and in 1864, to 1,879,798 cwt. The imports of flour in November were only 367,169 cwt., against 402,897 cwt. in 1866, 415,855 cwt. in 1865, and 225,740 cwt. in 1864. During the eleven months ending November 30 we imported as much as 30,313,716 cwt. of wheat, being nearly 10,000,000 cwt. more than in the corresponding period in 1866; but, on the other hand, our imports of flour show a falling off of 1,400,000 cwt. The particulars of these imports are supported:

ports are subjoined:

The cotton trade continues in an uncertain state, and American produce, to arrive, is pressed for sale. Several failures have lately taken place at Manchester.

In American securities the principal feature is a continued upward movement in the value of Illinois Central Railroad shares. On Monday and Tuesday Five Twenties were firm; but the market to-day has been weaker. Other American securities have commanded but little attention. Annexed are the highest and lowest prices on each of the three first days of the week:

U. S. 5-20's	Monday.	Tuesday.	Wednesday.

Illinoi shares (\$100)	8814@89	8934@90	89 7 6 90

### English Market Reports-Per Cable.

The daily closing quotations in the markets of London and Liverpool for the past week, have been reported by submarine telegraph as shown in the following summary;

London Money and Stock Market.—Consols have ranged from 92\frac{1}{4} to 92\frac{1}{4}, declining gradually. The bank reserve has increased by £227.000. American securities have advanced with the fall in gold. U. S. 6's. (5.20's) close at 72; Illinous Central shares at 89\frac{1}{4}, after selling at 90, and Erie shares at 49\frac{1}{4}, after selling at 50\frac{1}{4}. The Frankfort market for U. S. 6's has advance i from 75 11-16 to 76 13-16.

	Fri.	Sat.	Mon.	Tues.	Wed.	Thu.
Consols for money	92%	92%	92 11-16	92 9-16	92 9-16	9216
U S. 6's (5 20's) 1862	71 11-16	71%	71	71 11-16	72	72
Illicois Central shares	89%	90	89%	8934	89%	8934
Erie Railway shares	48%	48%	8014	4914	49%	49%

Tiverpool Cotton Market.—Cotton has been moderately active at an advance of \$\frac{1}{2}d\$ for stock at hand. For cotton to arrive the prices have been irregular, varying for Middling Uplands from 7@\$\frac{3}{2}d\$, and closing at \$\frac{3}{2}d\$. The sales as daily reported foot up \$64.000 bales for the week, as follows:

		Frt.	Sat.	Mon.	Tues.	Wed.	Thu.
Bale	sold	10,000	10,000	12,000	10,000	12,000	10,000

### Latest: Friday Evening, December 20.

At 5 P. M. the following quotations were reported:

Consols for money 92\$.

United States 6's (5-20's) of 1862, 72 1-16.

Mlinois Central shares 891, and Erie shares 491.

At Frankfort United States 6's were quoted at 76\$.

Liverpool cotton market ensier, but active. Uplands 7gd., and Or leans 7g. Sales 10,000 bales.

Breadstuffs unchanged.

Beef 112s.; pork 67s. 6d.; lard 50s.; bacon 40s. 6d.; cheese 52s. Produce unchanged.

London oil market steady at old prices

### COMMERCIAL AND MISCELLANEOUS NEWS.

IMPORTS AND EXPORTS FOR THE WEEK.—The imports this week show a considerable increase in both dry goods and in general mer chandise, the total being \$4,598,351 against \$2.187,172 last week, and \$2,404,701 the previous week. The exports are \$3,249,109 this week against \$4,628,013 last week, and \$3,957,208 the previous week. The exports of cotton the past week were 9,867 bales, against 16,263 bales last week. The following are the imports at New York for week ending (for dry goods) Dec. 13, and for the week ending (for general merchan lise) Dec. 14:

FOREIGN IMPORTS AT NEW YORK FOR THE WEEK,

Dry goods General merchandise	\$308,704 1,706,240	\$1,858,802 1,451,256	\$1,123,269 1,879,628	1867. \$918,280 3,680,071
Total for the week Previously reported	\$2.014,944 197,905,236	\$3,340,058 195,542,325	\$3,002,897 270,594,153	\$4,598,351 226,265,919
Since Jan. 1	\$199,920,180	\$193,882,383	\$273,597,050	\$230,864,270

In our report of the dry-goods trade will be found the imports of dry goods for one week later.

The following is a statement of the exports (exclusive of specie) from the port of New York to foreign ports, for the week ending Dec. 17:

### EXPORTS FROM NEW YORK FOR THE WEEK.

For the week Previously reported		1865. \$4,810,189 166,423,887	1866. \$4,095,672 178,485,338	1867. \$3,249,109 179,678,834
Since Jan. 1	\$905 047 210	9171 391 076	4104 501 010	A102.017.040

The value of exports from this port to different countries (exclusive of specie) for the past week, and since January 1, is shown in the following table:

To	This	Since	m-	This	Since
	week.	Jan. 1, 1867		week.	Jan. 8.

FRIDAY, DEC. 20, 1867, P. M.

The Money Market.—The last bank statement showed a further reduction of \$1,100,000 in loans, with an increase of \$2,100,000 in deposits, and of \$2,300,000 in legal tenders. The result of this improved condition of the banks has been apparent in an easier Money Market throughout the week. The Sub-Treasury has disbursed a considerable amount of currency upon coupons of June Seven-Thirties and in payment of the interest on December Compound Notes, which matured on the 15th inst. The principal of the notes has been redeemed generally in the 3 per cent Compound Notes; and these payments have probably increased the amount of currency in the banks during the week. The course of interior exchanges has been, on the whole, in favor of this city. Some remittances have been made to Cincinnati; but at nearly all other points exchange rules in favor of New York.

There has been an active demand for money for the purposes of stock and gold speculation; but, notwithstanding, the rate on demand loans has settled steadily to 6 per cent.

In banking circles, there is a generally more confident feeling. The fears excited by late failures have subsided, and credits are dealt in with more freedom. The temporary suspension of contraction has had its effect in encouraging discounting operations, and prime paper is now generally negotiated at 7 per cent. with occasional transactions at 8@8½ per cent.

The important financial discussions in Congress have had but little effect upon affairs in Wall street. Capitalists and bankers appear to regard the financial situation as fixed by its own conditions, and view the plans proposed in Congress as affording an occasion for talk, but as not likely to result in any important modification of the present condition of the finances.

The following are the quotations for loans of various classes:

The lone wing are the	dagano	as for lough of furious of	
	Per cent.		Per cen .
Loans on bonds & mort.  Prime endorsed bills, 2	@ 7	Good endorsed bills, 3 & 4 months	8 @12 11 @12 15 @25

United States Securities —In the market for Government securities there has been a generally stronger feeling throughout the week. The steady growth of ease in money has brought more

investment orders into the market, and a large amount of purchases has also been made for covering "short" sales. The market has been to some extent strengthened by the high price of Sixty-Twos. These bonds have been largely oversold by the foreign dealers, under the relatively lower price of the bonds in Europe; and upon the development of a firmer tone in the London and Frankfort markets, there has been an active demand for covering these sales; the result being an advance of 1 per cent. upon our last quotation. The "shorts" have been free borrowers of bonds for making their deliveries, in expectation of arrivals from London, half a million being reported to have come by the Africa, announced at Boston to-day. Sixty-Twos are offered 1071 seller 10, and were sold this afternoon at 1071 seller 30. It is understood that a considerable amount of Five-Twenties has been bought in Europe on New York account, and are now held subject to order, to be sent here if this market keeps permanently above quotations in Europe, and to be resold if the foreign market should range above New York. These purchases hanging over the market produce considerable uncertainty and foster speculation. New Sixty-Fives and Sixty-Sevens have been active and are 4 per cent. higher, in anticipation of the interest due on January 1st, which being worth \$4 in currency renders the bonds worth, ex interest, 1041 at the present prices.

On the 15th inst. the interest on the June Seven-Thirties becomes due. At the same date the December issue of Compound Notes become payable. Nearly the whole of the latter are likely to be converted into the 3 per cent. certificates; the interest is payable in currency.

The following are the closing prices of leading securities, compared with preceding weeks:

U. S. 6's, 1881 coup U. S. 5-20's, 1862 coupons.	Nov. 15. 113 1081	Nov. 22 113 108	Nov. 29.	Dec. 6. 1121/ 1073/	111%	Dec. 20.

RAILROAD AND MISCELLANEOUS STOCK .- The stock market has shown more activity, especially in the clique shares. The Vanderbilt stocks have shown considerable firmness, until the close of the week; when prices have fallen off under an otherwise buoyant market, indicating that the clique have been free sellers. New York Central so'd at 1184, but has since fallen to 1171. Erie touched 741, but closes weak at 731. Hudson River is § per cent. below our last quotations, a considerable amount of stock having been sold during the week. Reading has been active, touching 981, but closing at 95%. Michigan Southern closes 1% above our last quction. Cleveland and Pittsburg is 38 higher, and Northwestern preferred 2 per cent. It was proposed to pay a dividend of 7 per cant upon the preferred stock of Northwestern by a majority of Directors, but upon Mr. Keep threatening an injunction in case a dividend was declared excluding the common stock, the idea was abandoned until next May. The tone of feeling upon Western stocks generally is better than for some time past, but speculation is very much confined to brokers.

The following were the closing quotations at the regular board, compared with those of the six preceding weeks:

The Gold Market.—The downward tendency in the gold premium has been checked by the unexpected firmness in foreign exchange, and the purchase of a considerable amount of Five-Twenties in Europe. It appears to be now somewhat generally anticipated that we may ship a fair amount of specie; and as this will take off so much of the large amount to be paid out by the Treasury next month, there is less disposition to discount the effect of the January disbursements. The market at present is held in suspense between the two movements, not satisfied which is to be predominant. The most general idea appears to be, that the price may decline 1 or 2 points before January 1st, but that subsequently it will bound up to much higher figures. To-day the price has ranged between 133% and 134%. Loans have been made mostly "flat."

The introduction of important financial measures into Congress has not perceptibly affected the premium. Wall street appears to regard the Senate loan bill as altogether so impracticable that there is no probability of its adoption, and it is therefore considered as having no bearing upon the value of gold.

The fluctuations in the gold market during the week closing with Friday are shown in the following table:

	Open-		High-		Clos-	
	ing.	Lowest,	est.	Range.	ing.	Clearings.
Saturday, Dec.14	. 133%	1331	1841/	0%	134%	\$71,237,000

The movement of coin and bullion at this port for the week ending on Saturday, Dec. 14, was as shown in the following formula:

	Treasure receipts from California. Imports of coin and bullion from foreign ports. Coin interest paid from U. S. Treasury	\$671,447 25,438 238,000
	Reported new supply thrown on murket	\$934,885
	Withdrawn for export	2,783,143
1	Reported new supply in excess of withdrawals           Specie in banks on Saturday, Dec. 7.         \$15,805,254           Specie in banks on Saturday, Dec. 14.         14,896,648	
•	Increase of specie in banks	

Decrease of specie in banks 918,406—918,406
Actual excess of reported supply: balance retained in private hands
Actual deficit in reported supply: balance from unreported sources
929,852

Foreign Exchange.—There has been a continued scarcity of bills, especially of cotton bills. At the same time, considerable remittances have been made by bankers in settlement of accounts and by importers of Continental goods; and rates have consequently ranged, during the week, at a fraction over par. At the close, the market is rather easier. There is a difference of opinion as to the cause of exchange being so unusually high for this season, some regarding the rise as quite temporary, and due to the purchases of bonds in Europe; while others consider it to be owing to the inadequacy of our current exports to pay for over maturing obligations upon the heavy imports of late months. Probably both these causes are in operation.

The following are the closing quotations for the several classes of foreign bills, compared with those of the three last weeks:

# The Commercial Times.

### COMMERCIAL EPITOME.

FRIDAY NIGHT, December 20.

With the near approach of the Holidays the markets for general merchandise assume a quiet aspect; but it is easy to see that confidence in the stability of prices of nearly all the leading staples, whether foreign or domestic, is pretty well re-established; and on all sides it is expected that the New Year will be attended with a general revival of business.

Cotton has been steady, though but moderately active. Breadstuffs have been irregular and close somewhat unsettled. Tobacco has been more active. Groceries have been fairly active. We notice, in particular a considerable movement in Molasses, but at lower prices.

Provisions are exceedingly variable, and close unsettled.

Lard sold quite freely but closed quiet, and Cumberland Bacon is nominal. Butter and Cheese are drooping.

Hides have been quiet. Naval Stores have been more active and the close is steady. Rosins have been active. Petroleum has been steady, with a considerable business.

Freights have been less active; there is but limited room

on the berth, but rates have slightly declined for both weight and Cotton.

### Imports of Leading Articles.

The following table, compiled from Custom House returns, shows the foreign imports of certain leading articles of commerce at this port for the week ending Dec. 14, since Jan. 1, 1867, and for the corresponding period in 1866:

The quantity is given in packages when not otherwise specific	3 3

### COTTON.

FRIDAY, P. M., Dec. 20, 1867.

The receipts of cotton the past week at all the ports are the largest of any week this season, the total reaching 87,757 bales (against 79,176 bales last week, 87,481 bales the previous week, and 78,879 bales three weeks since), making the aggregate receipts since September 1, this year, 643,568 bales, against 594,715 bales for the same period in 1865-6, being an excess this season over last season of 48,853 bales. The details of the receipts for the past week, and the corresponding week of 1866, are as fol-

Received this week at* 1867. 1866.	-	Receipts
Received this week at* 1867. 1866.	Received this week at- 1	867. 186i
New Orleans bales. 24,278 31,979	Florida bales 1	.391 2,659

Total this week	23 829	100	1.753	10 493	1 568	890	4 909	49 466

For the corresponding week of 1866 the shipments from all the ports amounted to 31,664 bales, showing an increase for the week this year of 11,802 bales. The total foreign exports from the United States since September 1, 1867, now reach 288,722 bales, against 214,841 bales for the same period last year, and the stocks at all the ports are at present 299,266 bales, against 484,340 bales at the same time in 1866. Below we give our usual table of the movement of Cotton at all the ports since Sept. 1, showing at a glance the total receipts, exports, stocks, &c.:

Receipts and Exports of Cotton (bales) since Sept. 1, and Stocks at Dates Mentioned.

Same time last year	594,715	181,064	20,230	13,547	214,841	309,190	484,340

We have had a steady and moderately active market throughout the week, and prices close at a slight advance on those of last Friday. The receipts are again liberal, and the obstructed condition of the streets has added somewhat to the expense of handling; with, however, an improvement in exchange, some advance in Liverpool, a slight decline in freights, and spinners saking hold with more confidence, the market has gained strength the past two or three days, but closes to-day weak at the advance. The sales of the week foot up 17,446 bales, of which 5,032 bales were taken by spinners, 11,474 bales for export, and 240 bales on speculation. The following are the closing quotations.

			1	V. Orleans

By Telegraph.—The following telegrams liave been received by us to-night showing the receipts, exports and stocks

In this table, as well as in our general table of receipts, &c., we deduct com the receipts at each port for the week all received at such port from other such an extension of the such as the such ports. For instance, each week there is a certain amount shipped one Flor da to Savannah, which in estimating the total receipts must be denoted as the same shipment appears in the Florda return. We are thus particular in the statement of this lact as some of our readers fail to understand it. † The receipts given for these ports are only the shipments from Tennessee, Kennucky, &c., not otherwise enumerated.

‡ These are the receipts at Apaiachicola to Dec. 7, and at all the other orts of Florida to Dec. 13.

§ Estimate.

of cotton at the ports named for the week ending December 20, and price on that day:

### TOBACCO.

FRIDAY, P. M., Dec. 20, 1967

The exports of crude tobacco this week are extremely small, less, in fact, than for any similar period during this or last year, the total reaching only 585 hlids., 431 cases, 1,246 bales, 29 tierces against 2,265 hhds., 357 cases, 355 bales, 31 tierces for the previous seven days. Of these exports 199 hhds. were from New York, 341 hhds. from Baltimore and 45 hhds. from Boston, and the direction of these exports were to Great Britain 351 hhds., 156 hhds. to Havre, and the balance to various Below we give the particulars of the week's shipments from all the ports:

					Ste	ms		Man'f.
Export'd this week from	Hhds.	Case.	Bales.	Tcs.	hhds.	bales.	Pkgs.	lbs.

Total previous week	1,395	490	1,034	2	823		416	74,494

The market this week has been more active for Kentucky Leaf, but otherwise quite dull. There has been a better demand for Kentucky Leaf, both for export and consumption, at pretty full prices. The sales of the week amount to about 550 hhds. at 63@16c. for Lugs to good medium Leaf. Seed Leaf has been very quiet, and we have only to notice a sale of 25 cases State on private terms. Manufactured Tobacco has become very dull, but prices are without quotable decline. Spanish Tobacco is arriving freely and is dull and depressed—sales 150 bales Havana at 85@100c.; 25 do Yara at 95@105c., and 25 bales Yara to arrive on private terms.

### BREADSTUFFS.

FRIDAY, DEC. 20, 1867, P. M.

The market has been very quiet throughout the week, with some irregularity in prices.

Flour has declined about 25c. per bbl. for the low and medium grades, while the better grades have advanced fully as much. The late speculative buyers have withdrawn from the market, and the supplies by rail have latterly been more liberal, and receivers have been disposed to press sales from the wharf; which, in the absence of a general demand, has caused lower prices to be accepted for all except the higher grades, of which the supply is deficient. The prospects of liberal receipts of shipping flours by rail are good, but with lower freights and firmer gold, prospects at the close approxi-

wheat has been almost at a stand still, and prices at the close are nominally lower. Millers and shippers have alike held aloof, insisting that a material decline was necessary to bring them forward. At the same time, receivers have been firm, and the sales of the week do not exceed 75,000 bushels. At the close there is rather more inquiry, but at prices still below the views of holders. Straight No. 2 Spring could probably be sold at \$2 30, and \$2 25 was bid for No. 3 Club for export.

Corn has been more active for export the past few days; and, with a slight decline in ocean freights, prices have been maintained within two cents of the highest point, and rather better than last Friday, in the face of a decline in Liverpool to 46s. The receipts of new corn from the South and West are increasing; much of it is in very good condition, and being brighter and sweeter than the old, is taken in preference for steamer shipment at \$1 39@1 40, affoat. Oats have been dull, and closed lower. Rye and Barley have advanced on their scarcity, closing unsettled and nearly nominal.

The following are closing quotations:

### GROCERIES,

FRIDAY EVENING. Dec. 20, 1867.

The Grocery Trade has been unusually light during the week, and confined to the small parcels from second hands to supply immediate consumptive demand. Some business has been done from first hands, but all parties are interested more in squaring up accounts for the January showing than in entering into any new operations during the present uncertainty of trade. Some broken lots of goods have been sold at lower rates, but generally there is a good degree of steadiness to prices.

Imports of the week at New York have been 207 packages of Tea, 5,342 bags of Coffee, 172 hogsheads and 920 boxes of sugar, 602 hogsheads of foreign and 3,347 barrels of New

Orleans Molasses.

TEA.

There has been only a light business in invoices during the week, although a fair trade is reported in lines Prices show no material change. The sales from first hands are 1,100 half chests Greens and 950 do uncolored Japans. The imports of tea for the week have been only 207 packages from Liverpool by steamer.

The following table shows the shipments of Tea from China and Japan to the United States from June 1, 1867, to the date of latest advices by mail, and importations at New York and Boston since Jan. 1,

The above table includes all shipments to the United States, except 12,869 packages to San Francisco.

The indirect importation since January 1 has been at New York 161,517 packages, and at Boston 1 715 pkgs.

Hong Kong, October 14.-The circular of Messrs. Olyphant & Co. reports of tea:

"The Amoy market for Colongs was opened on the 16th September at \$24@26j "short" for fair to good cargo grades, or about \$3 under last season's rates, and settlements up to the departure of the \$3 under last season's rates, and settlements up to the departure of the mail amounted to 65,000 half-chests, later purchases being made at a considerable advance upon opening prices. A fair business had been done in Congous at about former rates. At Foochow, an increased business has been done in Congous, at prices showing no material change. There had been no transactions in Oolongs, though holders had given way somewhat in their demands. The Foochow market has since been considerable and purchase at A more have continued on a large scale, settleway somewhat in their demands. The Foochow market has since been opened, and purchases at Amoy have continued on a large scale, settlements at the two ports to date amounting to 187,000 half-chests, or nearly 7,500,000 lb, being the largest quantity of Ooolong Tea ever

purchased for America in so short a period after the opening of the markets. No less than fourteen vessels have been taken up to load from these two ports for America, and their cargoes will arrive to market at very short intervals.

### COFFEE.

The market for Rio Coffee is dull and nominal. The stocks are quite large, but the pressure is not sufficient to cause a treak in prices, and buyers are holding off until after New Year. The sales are 4,145 bags Rio and 3,600 do Maracaibo. The stock of Rio to-day is 114,000 bags,

The imports at this port for the week have been 5,000 bags of Rio per "Azelia," 162 bigs Java, and 180 of sundries. At Philadelphia the "John Boulton" has arrived from Rio with 4,605 bags, and at Baiti more the "Sirene" from Rio with 4,000 bags.

The imports since January 1, and stock in first hands Dec. 17, are

RIO DE JANEIRO, Nov. 7, 1867 .- Boje & Co.'s market report states : RIO DE JANKIRO, NOV. 7, 1867.—Boje & CO.3 market report states: Since issuing our last report on 23d ut., a fair dem und has prevailed in our coffee market up to the arrival of the European steamer, which, however, extended chiefly to good colory sorts for the United States and the north of Europe, in consequence whereof these have maintained their full values, whilst the lower ones have met with a decline of about 200 rs. After receipt of the unfavorable news buyers turned more received and are likely to continue an unless dealers turn more condessaved and are likely to continue as unless dealers turn more condessaved. Served, and are likely to continue so unless dealers turn more condescensive. We estimate sales at 19,800 bags. Our closing quotations for exchange are—London, bank bills 20½d; private bills 20½@åd; Paris, do 464 rs.; do 464-460 rs. The following vessels have sailed since our last.

		SU	GAR.			

A fair business has been done in raw sugars, and prices are well supported in the face of lower gold, on account of comparatively small tocks. The sales for the week amount to 1,874 hhds. and 3,350 boxes Havana, and 3,500 bags Manilla. Refined sugars are quiet and unchanged .

The imports for the week at all the ports have been 1,527 boxes against 6,728 last week, and 1,705 hhds. against 1,695 last week. The stock at New York is 14,078 boxes against 28,053, and 15,249 hhds. against 16,331 last week. The details are as follows:

				Manila,		Cu	ba-	Other

### MOLASSES.

There is only a nominal business in molasses. The free receipts of new crop New Orleans h s caused it to be sold lower, and somewhat unsettled the market for the time. The sales are 2,398 hhds. and 2,343 barrels New Orleans, at auction.

The imports of molasses at all the ports for the week have been 1,248 hhds., against 2,007 last week, and the stock of foreign on hand at New York is 9,101 hhds., against 9,356 last week. The details are as follows:

SPICES

There is only the usual light jobbing trade to report at this time in spices. Prices are steadily held, although with lower gold they are easier to meet in currency.

There is only a light trade in foreign dried fruits, chiefly in raisins at slightly lower rates. Domestic dried fruits are unchanged.

### THE DRY GOODS TRADE.

FRIDAY, P. M., December 20, 1867.

The dry goods market has relapsed into that state of quietness which is usual at this season, when merchants are desirous of reducing stocks preparatory to the New Year; consequently there is but little of interest or change to report in any department of domestic or foreign goods. Stocks are accumulating steadily, and manufacturers are reducing their productions when possible. There is but little encouragement to purchase or hold goods, for although prices are close down to cash, a reduction in price of labor and raw materials will enable manufacturers to produce at still lower rates. exports are more abundant this week, especially in heavy goods to the East.

The exports of dry goods for the past week and since January 1, 1867, and the total for the same time in 1866 and 1860 are shown in the following table:

	-Don	-FROM N	D, Good	is. Val.	Domestics.

The current month appears to be one eventful in the completion of railroads, already the opening of the Montgomery and Erie and the Middletown, Unionville and Water Gap Railroads, branches of the Erie Railroad, have been announced. We have also to record the completion of the Jackson, Lansing and Saginaw Railroad, an extension under this name of the Jackson Branch of the Michigan Southern Railroad. The Port Huron and Lake Michigan Railroad which in connection with the Chicago and Michigan Grand Trunk Railroad will stretch across the lower Peninsular and give Chicago another eastern route through Canada is rapidly approaching completion. It extends from Port Huron to Lansing. The Grand Rapids and Indiana Railroad is also complete from Grand Rapids to a point 20 miles north and is progressing favorably above Fort Wayne northward. The Amboy, Lansing and Traverse Bay Railroad has also been opened to a considerable distance northwest.

### 525 MILES

OF THE

# UNION PACIFIC RAILROAD,

Running West from Omaha Across the Continent

ARE NOW COMPLETED.

This brings the line to the eastern base of the Rocky Mountains, and it is expected that the track will be laid thirty miles further, to Evans Pass, the highest point on the road, by January. The maximum grade from the foot of the mountains to the summit is but eighty feet to the mile, while that of many eastern roads is over one hundred. Work in the rock-cuttings on the western slope will continue through the winter, and there is now no reason to doubt that the entire grand line to the Pacific will be open for business in 1870.

The means provided for the construction of this Great National Work are ample. The United States grants its Six Per Cent Bonds at the rate of fram \$16,000 to \$48,000 per mile, for which it takes a second Lien as security, and receives payment to a large if not to the full extent of its claim in services. These Bonds are issued as each twenty-mile section is finished, and after it has been examined by United States Commissioners and pronounced to be in all respects a first-class road, thoroughly supplied with depots, repair-shops stations, and all the necessary rolling stock and other equipments.

The United States also makes a donation of 12,800 acres of land to the mile, which will be a source of large revenue to the Company. Much of this land in the Platte Valley is among the most fertile in the world and other large portions are covered with heavy pine forests and abound in coal of the best quality.

The Company is also authorized to issue its own First Mortgage Bonds to an amoufit equal to the issue of the Government and no more. Hon. E. D. Morgan and Hon. Oakes Ames are Trustees for the Bondholders and deliver the Bonds to the Company only as the work progresses, so that they always represent an actual

The authorized capital of the Company is One Hundred Million Dollars, of which over five millions have already been paid in upon the work already done.

### EARNINGS OF THE COMPANY.

At present the profits of the Company are derived only from its local traffic, but this is already much more than sufficient to pay the interest on all the Bonds the Company can issue, if not another mile were built. It is not doubted that when the road is completed the through traffic of the only line connecting the Atlantic and Pacific States will be large beyond precedent, and, as there will be no competition, it can always be done at profitable rates.

It will be noticed that the Union Pacific Railroad is, in fact, a GOVERNMENT WORK, built under the see pervision of Government officers, and to a large extent with Government money, and that its bonds are issued under Government direction. It is believed that no similar security is so carefully guarded, and certainly no other is based upon a larger or more valuable property. As the Company's

### FIRST MORTGAGE BONDS

are offered for the present at NINETY CENTS ON THE DOLLAR, they are the cheapest security in the market, being more than 15 per cent. lower than U.S. Stocks. They pay

### SIX PER CENT. IN GOLD.

or over NINE PER CENT. upon the investment. Subscriptions will be received in New York at the Company's Office, No. 20 Nassau Street, and by

CONTINENTAL NATIONAL BANK, No. 7 Nassau Street. CLARK, DODGE & CO., Bankers, No. 51 Wall Street. JOHN J. CISCO & SON, Bankers, No. 33 Wall Street. HENRY CLEWS & CO., Bankers, No. 32 Wall Street. HEDDEN, WINCHESTER & CO., Bankers, No. 69 Broadway.

and by the Company's advertised Agents throughout the United States. Remittances should be made in drafts or other funds par in New York, and the bonds will be sent free of charge by return express.

### A NEW PAMPHLET AND MAP

showing the Progress of the Work, Resources for Construction, and Value of Bonds, may be obtained at Company's Offices or of its advertised Agents or will be sent free on application.

November 23, 1867.

### Insurance.

### UNITED STATES LIFE INSURANCE COMPANY, NO. 40 WALL STREET.

ASSETS.....\$2,300,000

New and important plans of Life Insurance have een adopted by this Company. See new Prospectus. Profits available after policies have run one year, nd annually thereafter.

JOHN EADIE, President. NICHOLAS DE GROOT, Secretary.

### Sun Mutual Insurance COMPANY.

(INSURANCE BUILDINGS)

49 WALL STREET.

Incorporated 1841.

Capital and Assets, ..... \$1,614,540 78 This Company having recently added to its previous assets a paid up cash capital of \$500,000, and subscription notes in advance of premiums of \$800,000, continues to issue policies of insurance against Marine and Inamad Navigation Risks. No Fire Risks disconnected from Marine taken by the Company. Dealers are entied to participate in the profits.

MOSES H. GRINNELL, President. JOHN P. PAULISON, Vice-President.

IBAAC H. WALKER, Secretary.

# The Mercantile Mutual

INSURANCE COMPANY.

No. 35 WALL STREET, NEW YORK. Assets, January 1st, 1867 .....

ORGANIZED APRIL, 1844.

During the past year this Company has paid to its

Policy-holders, IN CASH, a rebatement on premiums in lieu of scrip, equivalent in value to an average scrip dividend of TWENTY PER CENT.

Instead of issuing a scrip dividend to dealers, based on the principle that all classes of risks are equally routable, this Company makes such eash abtament or discount from the current rates, when premiums are paid, as the general experience of underwriters will warrant, and the nett profits remaining at the close of the year, will be divided to the stockholders.

This Company continues to make Insurance on Marine and Inland Navigation and Transportation Risks, on the most favorable terms, including Risks on Merchandise of all kinds, Hulls, and Freight.

Pélicies issued making loss payable in Gold or Currency, at the Office in New York, or in Sterling, at the Office of Ratilbone, Bros. & Co., in Liverpool.
